

## **Sydeem Girafe is the new Sigma Conso distributor for consolidated reporting and intercompany matching & reconciliation solutions in West Africa.**

Brussels, 11 July 2013 - Sigma Conso, a provider of software for consolidation and financial reporting, has appointed a distributor for West Africa: Sydeem Girafe, located in the Ivory Coast, will distribute Mona Group Reporting, a unified consolidation and reporting package and Mona InterWeb, an intragroup transaction reconciliation solution.

Sydeem Girafe is a consulting company with expertise in financial consolidation. Sydeem Girafe's consultants will develop standard parameters based on Ohada accounting standards to provide a solution that perfectly meets the needs of consolidators in Africa.

Sydeem Girafe is also a long-term Sage partner and has built strong ties with Sage's network of integrators and resellers in Africa. This will facilitate communication between Sigma Conso solutions and Sage's ERP solutions, which are widely used on the continent.

Mouhamadou Diop, Sydeem Girafe's Managing Director, explains: "We wanted to provide the financial management of West African groups with tools to facilitate their consolidated reporting while guaranteeing the irreproachable quality of their financial information (auditability, efficient data collection from subsidiaries, etc.). Mona Group Reporting and Mona InterWeb meet these challenges perfectly. They are powerful, easy-to-use software solutions that are inexpensive both to deploy and to maintain.

What is more, Sigma Conso intends to pursue their international development strategy. This gives us a great deal of confidence about our long-term relationship and about their commitment to assisting us in providing the solutions best-suited to the needs of our clients."

Dominique Galloy, Managing Director of Sigma Conso, adds: "West Africa has several high-growth markets. More and more local groups are expanding their presence in Africa and beyond. This means there is a need for flexible and reliable financial software to support their growth. Thanks to their local market presence and their expertise in consolidation and reporting, Sydeem Girafe is well positioned to provide the solutions best-suited to their needs."

### **About [Sigma Conso](#)**

Sigma Conso has its head office in Brussels. It provides Corporate Performance Management (CPM) software and services. The Group has recognised expertise in financial and statutory consolidation and management reporting. It provides over 500 international groups with tailored and flexible solutions that facilitate their financial management.
